

Retro Grey

Projection fabric

DESCRIPTION

The « Retro Grey » fabric is a translucent anthracite grey fabric with a gain of 0.25 suitable for rear projection and ideal for film and video projection

Characteristics Optimized viewing angle (180°)
Very good contrast and excellent colour reproduction
Reduces hot spots and ambient light interference

Special features This fabric has a very low gain and requires a double light output
It is suitable for dark environments but not for short-throw projection
The fabric is ideally used as a background for special effects
It can also be used as a front projection screen

TECHNICAL INFORMATION

Colour	Anthracite grey
